PHILOSOPHICAL MAGAZINE LETTERS, 1997, VOL. 76, NO. 6, 453–456

SUBJECT INDEX

Vol. 76

	PAGE
Al, grain boundary, Ga in	281
AlCuMg alloy, coarsening rates of S′ precipitates in	63
Al–Li–Ag, shearing and looping in	383
AlMgZn alloy, atomic structure of approximants	349
Al_3Mn-type Al_3 (Mn,Pd) crystal structures	357
Al–Ni–Co, plastic deformation of	369
Al_2O_3, creep resistance in	9
Amorphous silicon, enhanced deposition rate of	117
Antiphase-boundary energies in γ-TiAl	331
Approximant phase of μ-$Al_4Mn_xCr_{1-x}$	189
Approximant structure to Ti–Zr–Ni quasicrystal	199
Approximants of AlMgZn alloy	349
Atomic desorption process in electron-beam drilling	289
Bauschinger effect in Ni_3Al	269
Bond-charge modelling of grain-boundary energies	83
Boron, influence on Bauschinger effect in Ni_3Al	269
Buckminster fullerenes, point defects in	125
C_{60}, spray deposition of	413
Carbon nanospheres and tubules	363
Ceramic films, effect of surface structure on growth of	223
Chalcogenide amorphous films, absence of photodegradation in	233
Cluster calculation of band structure of $YBa_2Cu_3O_7$	427
Coarsening rates of S′ precipitates in AlCuMg alloy	63
Cohesive limit in a hyperelastic solid	307
Coincident-site-lattice model, reassessment of	25
Copper, dislocation structures in	237
Core structure of dislocations	15
Creep resistance, improvement by segregation	9
Crystallization, two-dimensional	99
Cu, epitaxial growth of Co on	315
Cu, growth of Fe–Co particles on twist boundaries in	69
β-CuZn, tensile and yield stress in	391
Defect R1 in irradiated diamond	57
Defects in $Zn_{1-x}Cd_xSe$/ZnSe GRINSCH lasers	181
Deformation fields of straight dislocations	139
Deformation mode in Al–Li–Ag crystal	383
Diamond, EPR of R1 defect in	57
Diamond, N3 centre in	93
Differential scanning calorimetry study of defects in Ni_2Si	33
Diffusion of ^{63}Ni in Ni_2Si	33
Dislocation, glide of curved	275
Dislocation pole mechanism for twinning	259
Dislocation structures in fatigued Cu	237
Dislocation structures in $L1_2Ni_3Ge$	399
Dislocations, core structure of	15
Dislocations, deformation field of	139
Dislocations, multiplication of misfit	1
Domain microstructure in $La_{1-x}Pb_xMnO_3$	41

Elastic waves in a hyperelastic solid 307
Electron channelling contrast imaging in Cu 237
Electron irradiation of bucky onions 125
Electron paramagnetic resonance of defect R1 in diamond 57
Embedded particles, melting of 105
Epitaxial growth of Co on Cu 315

Fe–Al alloy, ω-phase formation in 207
FeAlBC alloy, precipitation in 323
Fe–Co particles, growth in Cu of 60
Fermi-liquid behaviour in transition-metal alloys 89
Fullerenes, point defects in 125

Ga in an Al grain boundary 281
Germanium, tilt grain-boundary energies in 83
Glass transition in grain boundaries 143
Glide of curved dislocation 275
Grain boundaries, dislocation structures associated with 399
Grain boundaries, glass transition in 143
Grain boundaries, segregation in 9
Grain boundaries, vicinal high-angle 25
Grain boundary, computational study of Ga in Al 281
Grain boundary, solute drag and wetting of 133
Grain triple junctions in columnar ice 159

Hagen–Strunk mechanism of dislocation multiplication 1
Helium isotopes, vacancy formation energy in 377
Heteroepitaxial layers, dislocations in 1
HREM of γ-phase in Ti_4Al_3Nb 167
HREM study of atomic desorption in MgO 289
Hydrostatic pressure, pockets of 409
Hyperelastic solid, elastic waves in 307

Ice, stress concentrations at grain junctions in 159
In/a-Se multilayer films, interface reaction in 299
InP (001)–GaAs (001), wafer-fused interface 445
Interface reaction in In/a-Se multilayer films 299

Langmuir–Blodgett films of polyethyleneglycoldistearate 99
Laser deposition of SrS films 111
Lasers, blue and blue–green, defects in 181
Lattice distortion in $La_{1-x}Pb_xMnO_3$ 41

Magnetism of μ-$Al_4Mn_xCr_{1-x}$ approximant phase 189
Manganites, quadrupolar response of Mn ions in 435
Matthews–Blakeslee theory, shortcomings of 77
Melting behaviour of embedded particles 105
Mesoscopic 'volcano' structures in epitaxial growth 315
MgO, electron-beam drilling of 289
Mn ions in manganites 435
Multilayer films of In/a-Se 299

N3 centre in neutron-iradiated diamond 93
Nanospheres and tubules of carbon 363
Ni_3Al, Bauschinger effect in polycrystalline 269
Ni_3Ge, dislocation structures in 399

Ostwald-like ripening in Langmuir–Blodgett films 99

ω-Phase formation in Fe–Al alloy 207
Photochromic behaviour of N3 centre in diamond 93
Photodegradation in amorphous chalcogenide films, absence of 233
Plastic deformation and fracture of Ti–Al alloys 409
Plastic deformation of decagonal Al–Ni–Co 369
Point defects in electron-irradiated bucky onions 125
Point defects in Ni_2Si 33
Polyethyleneglycoldistearate, crystallization of 99
Precipitation in an extended FeAlBC alloy 323
Pyrolysis of hydrocarbons 363

Quadrupolar response of Mn ions 435
Quantal crystals of He, vacancy formation in 377
Quasicrystals of Al–Ni–Co, deformation of 369

Rietveld method for AlMgZn approximants 349

S′ precipitates in AlCuMg alloy 63
Segregation in grain boundaries 9
Selenium, superheating of 49
Shearing and looping deformation modes in Al–Li–Ag 383
Si and SiO_2, vibration of interface between 173
Silicon, amorphous, deposition of 117
Silicon, tilt grain-boundary energies in 83
SiO_2, reduction of 173
Solute drag of a grain boundary 133
Space-filling polyhedron 423
Sputtered a-Si, enhanced deposition rate of 117
Sputtered films of $(Bi,Pb)_2Sr_2Ca_2Cu_3O_y$ 217
SrS thin films, growth of 111
Stacking faults in ZnSe/GaAs epitaxial layers 153
Stainless steel, pitting in 341
Strength, absolute unit of 321
Stress anomaly in β-CuZn 391
Stress concentration at grain junctions in ice 159
Structure of μ-$Al_4Mn_xCr_{1-x}$ approximant phase 189
Superheating of embedded particles 105
Superheating of polycrystalline selenium 49
Surface structure, effect on growth of ceramic films 223

TEM of twinning in titanium carbonitride 247
TEM study of sputtered $(BiPb)_2Sr_2Ca_2Cu_3O_y$ 217
Tensile stress, superimposition on tensile stress in β-CuZn 391
Ti–Al alloys, plastic deformation and fracture of 409
γ-TiAl, antiphase-boundary energies in 331
TiAl, dislocation pole mechanism for twinning in 259
Ti_4Al_3Nb, high-resolution electron microscopy study of 167
Tilt grain-boundary energies in Si and Ge 83
Titianium carbonitride, twinning in 247
Ti–Zr–Ni icosahedral quasicrystal 199
Transition-metal alloys, deviations from Fermi-liquid behaviour in 89
Transmission electron microscopy of stacking faults in optical layers 153
Twinning in TiAl 259
Twinning in titanium carbonitride 247
Twist boundaries in Cu 69

Vacancies in Ni_2Si 33
Vacancy formation energy in He isotopes 377
Vibration of interface between Si and SiO_2 173
Viscous glide of curved dislocation 275

Wafer-fused InP (001)–GaAs (001) interface 445
Wetting of a grain boundary 133

X-ray diffraction of $Al_3(Mn,Pd)$ 357

$YBa_2Cu_3O_7$ films, anisotropy of band structure 427
Yield stress of β-CuZn 391

ZnCdSe/ZnSe graded-index lasers 181
ZnSe/GaAs epitaxial layers, TEM study of stacking faults in 153

PHILOSOPHICAL MAGAZINE LETTERS, 1997, VOL. 76, NO. 6, 457–461

INDEX OF AUTHORS (WITH TITLES OF PAPERS)

Vol. 76
